provide insights:
```

```
Document Content:  
{document}
```

```
Task:
```

1. Extract main keywords.
2. Summarize in 3 sentences.
3. Identify the main topics.
4. Perform Named Entity Recognition (NER) to detect people, organizations, locations, and dates.

```
Output format:
```

- **Keywords:** [list of keywords]
- **Summary:** [summary]
- **Topics:** [topics]
- **Entities:** [list of entities categorized as People, Organizations, Locations, Dates]

```
Now, process the document.
```
